

The Public Works & Utilities Department will be conducting their annual FALL HYDRANT MAINTENANCE PROGRAM along with HYDRANT FLUSHING **starting September 30th and continuing through the month of October.**

This routine maintenance program will occur between the hours of 07:30 a.m. to 4:00 p.m. It may result in some temporary minor inconveniences; such as discoloured water or loss of pressure. We also recommend that water users check their water for discoloration before using it to wash light coloured clothing.

The discoloured water is safe for human consumption as it is caused by harmless sediment that has been stirred up in the water mains. This discoloration will clear up in a short period of time. We apologize for any inconvenience this maintenance program may cause but is necessary to maintain the quality of water.

For more information please contact:

Public Works & Utilities Department
Phone: 613-283-4124 ext. 3302

We thank you for your patience, co-operation and understanding, during this matter.
